black - cargo and mechanical interface
green - propellant (xenon)
red - electrical power
dashed red - thermal
dashed dark blue - commands and data
dotted purple - radio link
Cislunar Cargo Tug
Propellant Module
Supply propellant in orbit ACT-18
Xenon coupling CE-13
Launch Vehicle
Launch cargo and propellant to staging orbit ACT-04
Cargo and module stack CE-12
Xenon transfer line CE-02
Docking and refuelling interface (DRI)
Receive propellant in orbit SF-02
Capture cargo in Earth staging orbit SF-01
Electric propulsion (PROP)
Store and feed propellant SF-03.2
Generate thrust SF-03.1
Thrust commands CE-03
Guidance, navigation and control (GNC)
Control trajectory and attitude SF-03.4
Thermal interface CE-10
Thermal control (TCS)
Control temperatures and reject heat LF-07
High-power bus CE-01
Electrical power (PWR)
Store and distribute electrical power SF-03.6
Perform rendezvous and proximity navigation SF-03.10
Proximity state CE-07
