purple - FC-1 cargo delivery
green - FC-2 refuelling
red - FC-3 disposal
grey - other functional exchanges

Ground Segment
Monitor and command transport ACT-13
Plan end-of-life disposal ACT-14
Telecommands FE-03
Telemetry FE-04
Disposal command FE-09
Cislunar Cargo Tug
Execute telecommands SF-03.7
Manage modes and failures SF-03.9
Provide telemetry SF-03.8
Perform disposal manoeuvre SF-07.1
Operational commands FE-18
Housekeeping and mode status FE-19
Navigation state FE-15
Disposal trajectory FE-23
Passivation order FE-24
Sun
Provide sunlight
Sunlight FE-10
Generate electrical power SF-03.5
Determine orbit and attitude SF-03.3
Control trajectory and attitude SF-03.4
Relative navigation state FE-16
Passivate the system SF-07.2
Raw power FE-11
Thrust command FE-17
Lunar Orbit Destination
Store and distribute electrical power SF-03.6
Thruster power FE-12
Generate thrust SF-03.1
Perform rendezvous and proximity navigation SF-03.10
Clear approach and docking ACT-15
Approach clearance FE-05
Xenon feed FE-14
Propellant Module
Supply propellant in orbit ACT-18
Propellant FE-02
Receive propellant in orbit SF-02
Store and feed propellant SF-03.2
Docked state FE-21
Xenon to storage FE-13
Launch Vehicle
Launch cargo and propellant to staging orbit ACT-04
Cargo in staging orbit FE-01
Capture cargo in Earth staging orbit SF-01
Secured cargo FE-20
Hand over cargo at lunar destination SF-04
Delivered cargo FE-06
Receive delivered cargo ACT-16
Hand over return cargo in Earth orbit SF-06
Secured return cargo FE-22
Collect return cargo SF-05
Provide return cargo ACT-17
Return cargo FE-07
Returned cargo FE-08
Cargo Customer
Receive returned cargo ACT-03
